Announcement of T7 Release 8.0 and simulation dates for T7 Release 7.1

1. Implementation and communication schedule for T7 Release 8.0

The production launch of T7 Release 8.0 is planned for 18 November 2019. The following diagram gives an overview of the introduction schedule:

Deutsche Börse AG will provide a dedicated release simulation environment in order to give Trading Participants the opportunity to perform comprehensive testing of their trading applications, independently of the T7 production environment. The simulation period for T7 Release 8.0 is planned to start on 9 September 2019.

In addition to the T7 release simulation, Trading Participants can also use the T7 Cloud Simulation that allows Trading Participants and Independent Software Vendors (ISVs) to test against the current T7 production and simulation software versions. In this environment, Trading Participants can initiate predefined market scenarios and test specific strategies more easily than in a shared environment. The T7 Cloud Simulation is permanently available (24/7) for a fixed price per hour and is accessible using an SSL-encrypted internet connection. The T7 Cloud Simulation will start in advance to the usual release simulation.

For more information on the T7 Cloud Simulation, please refer to the Eurex website under the following path:

Eurex Exchange > Technology > Eurex T7 Cloud Simulation

Eurex Exchange is committed to providing Trading Participants and ISVs with information updates throughout the development of T7 Release 8.0 in order to support adequate planning and to ensure a successful launch.

In May 2019, Eurex Exchange will publish the detailed preliminary release notes listing the functional and technical enhancements that will be available in T7 Release 8.0.

The following existing documents will be revised for T7 Release 8.0:

- Preliminary versions (identified by ◆) will be published in May/August 2019,
- simulation versions (identified by ■) will be published in August/September 2019, and
- final versions (identified by ●) will be published between August and November 2019 prior to the production launch
